## Baby Find: Introducing the New Baby Planet Strollers

Category: **Baby Finds Strollers**

**What:** **Baby Planet Solo Deluxe Stroller**

**Why:** It's a whole new world with the new Solo Deluxe Stroller by **Baby Planet**. Combining sleek modern design with hint of drama (check out the curvy profile and rich color combinations), this stroller looks much more expensive than it really is, and it's worth every penny.

How does it roll? It's easy to maneuver, handles turns smoothly and provides a velvety smooth ride—just like a luxury car for baby, and you're the chauffeur. Surprisingly lightweight, the aluminum frame makes the most out of its compact size, making it convenient for everyday use. Also, the height of the handles can be adjusted, so mom, dad and big sibs can each have a custom grip.

And we love all the little extras. The peek-a-boo window on the canopy lets you view baby, the seat reclines for sleepy babies on the go, the leg supports adjust with your growing tot, and cup holders are included for thirsty parents and kids.

But there's more. The company is also dedicated to the helping clean up the environment. Ship your used Baby Planet stroller back free of charge, and they'll either recycle it or fix it up and donate it to charity.

**Price:** \$269.99
